

Colm Branigan in conjunction with the **Leinster Driving Campus** now offers a new & exciting driving training solution, **our Skid Control & Emergency Braking Course**.

This course specially tailored to suit corporate groups, (6 no. delegates per course) lasts 2 hours & provides delegates with the opportunity to attain essential car handling skills & knowledge.

The course takes place on a purpose built off-road training facility in Maynooth, Co. Kildare, located less than 5 minutes from Junction 7 off the M4. The course includes a presentation on skid avoidance & skid control techniques & includes information & guidance on the use of modern car safety aids such as ABS (Anti-Lock Braking Systems), EBD (Electronic Brakeforce Distribution) & ESP (Electronic Stability Programmes).

On campus, the delegates will have the opportunity to gain invaluable “hands on” experience on a clear water skid pad which can simulate all types of hazardous road conditions. Vehicles will be provided for delegates use.

Delegates will also have the opportunity to acquire skills in the use of ABS & Electronic Brakeforce Distribution on specially designed emergency avoidance courses set up on campus.

At all times delegates will be accompanied by registered instructors with the Road Safety Authority who have a high level of experience in car control handling & training exercises. All delegates will be provided with the appropriate health & safety equipment on site.

The track instructors will demonstrate the driving techniques needed for each activity before the delegates are put in the hot seat! On the skid pad, delegates will be helped to understand & practise oversteer & understeer car control techniques.

The delegates will be encouraged to let the car slide and even spin around! This will allow the delegate to build confidence & to practise the techniques needed to bring the car back in control from some seemingly impossible situations!

Special arrangements will be made so that the campus will be closed to all other users during the course ensuring a dedicated & safe training environment for each group of delegates.

This course will be both informative & challenging and a great opportunity to acquire new or enhance existing skills.
